App development and low-code

Use ServiceNow no-code, low-code, and platform developer tools to create and modify apps that run on the ServiceNow AI Platform.

ServiceNow AI Platform[®] App Engine products, enhanced by Now Assist AI, offer low-code mobile and web application development platforms for creating new business applications and customizing existing ServiceNow applications, accelerating your digital transformation.

ServiceNow workflows provide automated sequences of tasks that your applications can leverage to reduce manual tasks, errors, and organizational inefficiency.

App Engine products and features

For a full list of App Engine products, see the [ServiceNow product site](#) [↗](#).

App development product offerings

The following table lists the products and features that you can use to develop apps on the ServiceNow AI Platform.

App development products and offerings

Product name	Description
App Engine Studio ↗	Build apps at scale with a low-code development environment and prebuilt templates.
App Engine Management Center ↗	Empower business and IT to collaborate, manage, and govern low-code app development.
Automated Test Framework ↗	Complete upgrades and innovate faster. Reduce risk and quickly remediate customization issues by automating slow manual testing.
Creator Studio ↗	Empower citizen developers to create natively compliant request-based applications with a guided no-code end-to-end development, streamlining app dev stages from days to minutes.

App development products and offerings (continued)

Product name	Description
Delegated Development	Enable developers of any skill level to build apps for specific projects.
Guided Application Creator	Get guidance to rapidly create applications, define data, and configure user experiences.
Mobile App Builder	Create and deploy native mobile experiences using an intuitive designer.
Now Assist for Creator	Improve developer productivity with AI-based flow generation and intelligent code recommendations.
Performance Analytics	Anticipate and continuously improve with real-time analytics.
Prebuilt Templates	Accelerate development with templates that satisfy a variety of use cases
Predictive Intelligence	Simplify and accelerate everyday work with built-in machine learning.
Playbooks	Build and manage multiple complex workflows with no-code playbooks.
Process Mining	Improve outcomes by optimizing process flows to streamline work.
Service Portal	Deliver mobile-friendly, self-service experiences to your customers and employees with an easy-to-use portal framework.
ServiceNow IDE	Use a web-based integrated development environment to build, deploy, and manage your apps.
ServiceNow Studio	Access all the tools you need in one unified, intuitive development environment. Empower your developers to innovate, build, and deploy apps faster using AI-powered technology.
UI Builder	Create and customize workspace pages with a single builder. Deliver engaging, personalized employee experiences.
Virtual Agent	Resolve issues fast with an intelligent chatbot that understands simple, human language.
Workflow Studio	Build flow to automate business processes as digital workflows across departments, apps, and systems.
	Deliver personalized experiences that engage teams and supercharge productivity with the configurable workspaces.
