

# Security Operations

Security Operations brings incident data from your security tools into a structured response engine that uses intelligent workflows, automation, and a deep connection with IT to prioritize and resolve threats based on the impact they pose to your organization.

Identify, prioritize, and remediate vulnerabilities with the Vulnerability Response application.

Identify, prioritize, and remediate critical security incidents with the Security Incident Response application.

Identify, prioritize, and remediate misconfigured assets with the Configuration Compliance application.

Access your company's Structured Threat Information Expression (STIX) data with the Threat Intelligence application.

Access the Security Incident Response and Vulnerability Response applications from your mobile device.
